MORE ABOUT US

OUR TAKE ON INCLUSION

Unlike some more radical movements that polarize social groups and tend to make executives feel guilty, we advocate non-divisive positive psychology. We start from the premise that inclusion is not what our brain does naturally. If we don't pay attention, we can accidentally exclude.

We promote responsibility, empathy, and acceptance in a journey unique to each of us. Some of us have often been part of the majority, while others have often been in the minority. Some of us have been immersed in diversity throughout our lives, while others have not.

All of us can deliberately practice inclusive leadership at our own pace, within an environment of psychological safety.

LEARNING METHODOLOGY

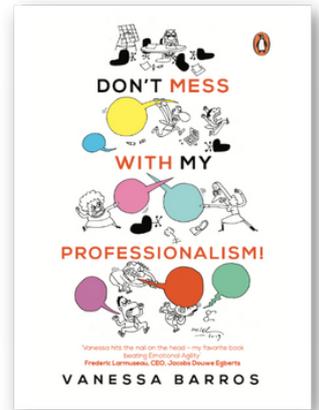

Each session will follow the four steps of David Kolb's experiential learning methodology:
